

**GEO-FOUNDATIONS**  
Contractors Inc.

## **JOB DESCRIPTION**

**Company:** Geo-Foundations Contractors Inc.  
**Job Title:** Field Engineer - Construction  
**Job Length:** Permanent Full-time  
**Job Location:** Acton, Ontario based - Construction sites across Ontario and Canada  
**Approx. start date:** Immediate openings  
**Preferred Disciplines:** Geotechnical or Civil Engineering

**Geo-Foundations Contractors Inc.** (GEO) is a specialty geotechnical contracting firm with its head office in Acton, Ontario. The company is focused on the implementation and further development of advanced technologies in geotechnical construction, specializing in foundation support, ground improvement, and ground treatment.

Working throughout Canada, GEO offers a wide range of ground related construction services to the civil, industrial, commercial, and institutional sectors of the construction industry, with cost effective solutions to a wide range of geotechnical problems.

GEO constantly looks to provide the industry with alternatives to conventional technologies through the use of specialized equipment and design, and also keeps in mind the environmental impact of its services through the use of bio-friendly materials and innovative design-build solutions.

We are currently seeking engineers to join our technical team whose members split their time between design and operations. This position will provide the successful candidate with solid technical training gained from practical, on-site learning, with plenty of book-based training and mentoring from our experienced staff. This position is considered an entry level position with opportunities for advancement.

### Duties and Responsibilities:

1. QA/QC on projects.
2. Post-tensioning of rock anchors.
3. Static load testing of micropiles in compression and tension.
4. Design development and simultaneous field engineering on multiple projects.
5. Monitoring of drilling and grouting operations.
6. Daily logging of work completed.
7. Quality control supervision via real-time inspection.
8. Majority of working days spent on site at construction projects.

Once you join Geo-Foundations Contractors Inc. you will be working side-by-side with the some of the top talent of this specialized industry. The diversity of technology, equipment and design will provide many opportunities to contribute to be part of our accomplishments thus allowing you to develop your skill sets while providing you with a productive and rewarding work environment.

Geo-Foundations Contractors Inc offers competitive wages and benefits, based upon experience.
