

# GEO-FOUNDATIONS CONTRACTORS INC.

---

## Superintendent

*Are you interested in participating in a fast growing entrepreneurial environment where people are the priority?*

GEO-Foundations Contractors Inc. is a young company at the forefront of Ground Modification Technologies in Canada, with a solid reputation for high quality work and professionalism. It is our intention to become the best company of our kind by continuing to set the standard for performance and innovation. We are searching for a full-time Superintendent to join our team. We offer a rewarding work environment that fosters integrity, honesty and nurtures the exchange of ideas and customer satisfaction.

### **Reporting to the Project Manager your primary responsibilities will include the following:**

- As a member of the Project Site Team, manages all on-site construction activities on a daily basis in accordance with contract requirements;
- Ensures all Geo-Foundations Contractors and OSHA safety regulations are adhered to and enforced to create and maintain a safe work environment throughout the jobsite;
- Conducts safety meetings and provides safety training as required;
- Implements and ensures compliance with project construction plan, schedule and budgets;
- Monitors work performance and efficiency of on-site Field Engineer, Employees and Subcontractors to ensure effective execution of the project;
- Supervises craft labour as required including hiring, terminating etc;
- Ensures quality control checks are performed and project materials and workmanship meet the project Quality Standards;
- Reviews and/or prepares all required on-site documentation;
- Participates in on-site meetings and coordinates construction activities with the client;
- Advises senior management of potential problems, work interferences or schedule difficulties while assisting in circumventing/resolving such conflicts;
- Performs additional assignments as directed by Management or as required for successful project completion.

### **Knowledge and Skill Requirements:**

- Engineering degree or equivalent combinations of technical training plus extensive (5+ years) relevant experience;
- Proven ability to lead, manage and evaluate trade performance;
- Strong knowledge of various construction disciplines, safety regulations, scheduling, cost control, quality control, engineering drawings and other related documents;
- Proficiency in MS Office (Word, Excel, Outlook);
- Ability to assume responsibility, interface and communicate with others is essential;
- Enthusiasm for challenge and new initiatives;
- Projects are across Canada therefore a willingness to travel is required.

**If you are interested in being considered for this opportunity please submit your cover letter and resume by January 1, 2010 through one of the following:**

**Email: [kkelly@geo-foundations.com](mailto:kkelly@geo-foundations.com) OR fax: (519)853-5847**

*We thank all applicants for their interest, however, only those identified for further consideration will be contacted.*
